Mean:						15.6	27.1	
Additional or out of expected range results								

Special Instructions for application supplied at the time of evaluation

Broad Spectrum.

Preliminary Comments:

The preliminary result for the static test is within 10% of the nominated SPF value or mid point of the nominated range of values. The letter "A" following the Test Subject I.D. number indicates that the product was applied and evenly spread, without rubbing in.

This is a preliminary report and should not be interpreted as indicating full compliance with AS/NZS 2604
